

Car Price Predictions summary

https://www.youtube.com/watch?v=Hd_83OykqbY

Prepare power Bi dashboard for ML prediction

- Activity: Create a title for your dashboard
- Activity: Using slicer create Engine Type, Cylinder Number, Fuel Type and Phase.
- Activity: create number of cars per car body using cluster column chart.
- Activity: create Average price per car and number of cars using card.
- Activity: create Average price per car body using cluster column chart.
- Activity: create number of cars per phase using clustered bar chart.

Prepare power Bi dashboard for ML prediction

- Activity: create Best predictors for car price using textbox.
- Activity: create price vs Engine size using scatter plot.
- Activity: create actual vs predicted price using clustered bar chart.
- Activity: create summary table using table.
