1. List **two** brainstorming techniques to generate ideas.
2. Discuss techniques to identify the suitability of an idea for implementation within a project. How might an idea or possible solution be evaluated?
3. Describe a practical or operational reason a project might not proceed.
4. Describe effective methods of evaluating solutions of systems against a business and its objectives.
5. Describe in your own words two emerging trends or technologies in your field and how they impact it.
6. Identify an existing product or service that would allow this technology or trend to be implemented in a project. (Also provide evidence as links and screenshots of those services)
7. List **two** example sections that could be included in an action plan document and describe their purpose.
