

List of all WordPress hooks

WordPress coders, theme authors, and plugin developers use the hooks listed below to change how WordPress behaves without needing to edit any PHP source files. Use this index to identify the WordPress hooks that you need.

- Click a column name to sort.
- For a specific WordPress hook's version history and file locations, click on the hook's name.
- If a hook is not in the most recent version (6.2), then it is **deprecated**. Do not use it.
- Viewing options: [View all hooks](#) • [View action hooks](#) • [View filter hooks](#) • [View deprecated hooks](#)

Important warning about variable hooks

Some hooks have variables in their names. For example, `pre_{\$taxonomy}_{\$field}` and `admin_head-` both have variable names. In general, any hook that ends (or begins) with `-` or `_`, or contains a `$`, has a variable name. Since the syntax with which these variables are defined may change from version to version, this page may think that a hook is deprecated (or new) even if it is not. You can usually catch this sort of thing by comparing this hook to the list of "related hooks" below.
